- Prochaines rencontres : 24/26 Mars - Brest

QGIS Model Designer / Modeleur graphique

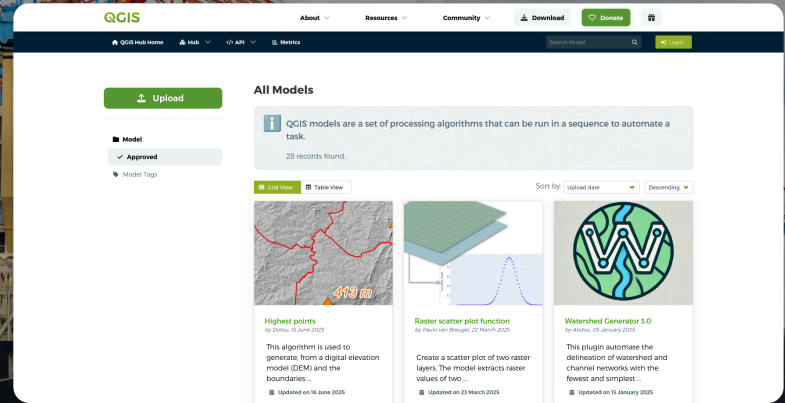

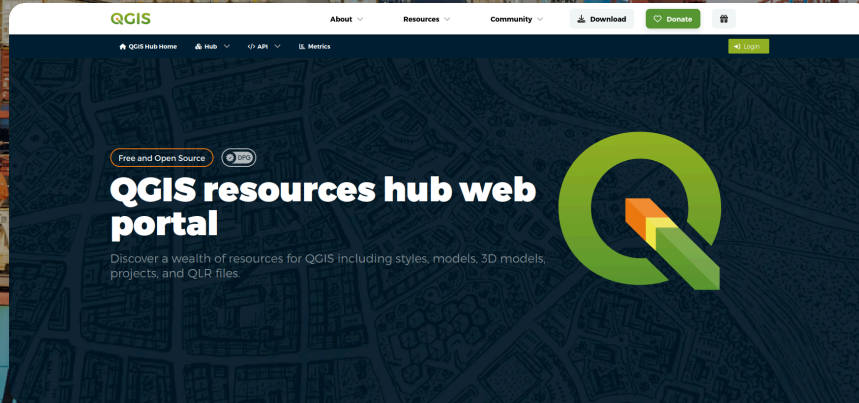

- No need to be a programmer !

Demo

How to share models or processing scripts ?

- Share (by mail ?) the .model3 or .py file
- Use the QGIS Resources Hub (<https://hub.qgis.org>)

Not optimal

- multiple models / scripts to share
- how to send a new version ?
- how to share documentation ?

Better solution : create a QGIS plugin

- But you need to be a programmer !

A plugin to generate the plugin !

- Models2Plugin allows you to create a QGIS plugin for sharing your models
- <https://github.com/marcu/models2plugin>

Demo 2

Conclusion

Thanks you for your attention
